EDUCATION

The Islamia University of Bahawalpur — Bahawalpur, Pakistan
*Bachelor of Science in Computer Systems Engineering; **CGPA: 3.71/4.00*** — *Sep 2021 – Present*

SKILLS

Core: TypeScript, JavaScript (ES6+), HTML5, CSS3
Frontend: React.js, Next.js, TanStack Query, Zustand, Tailwind CSS, Chakra UI, Framer Motion, shadcn/ui
Testing & Tools: Jest, React Testing Library, Playwright, Git, GitHub Actions, Vite, npm/yarn/pnpm/bun
API Integration: RESTful APIs, GraphQL, OpenAPI/Swagger
Cloud & Deployment: Vercel, Netlify, Docker
Methodologies: Component-Driven Development, Responsive Design, Mobile-First Approach, CI/CD

EXPERIENCE

NEARBuilders — Remote Part Time
Frontend Engineer — *Sep 2023 – Present*

- **BetVex** | *Website*
  * Led a comprehensive UI overhaul of the dashboard, implementing modern design principles and enhancing user experience with responsive layouts and intuitive navigation.
  * Integrated GraphQL indexer for real-time data fetching, optimizing performance and reducing load times by 40% while ensuring seamless data synchronization.
  * Executed a major UI uplift by implementing component-based architecture, improving code maintainability and establishing a consistent design system across the platform.

- **NEAR Catalog** | *Website*
  * Architected and developed a full-featured catalog platform using Next.js, TypeScript, and React Query, showcasing NEAR blockchain projects with optimized SEO and performance.
  * Implemented dynamic data fetching and caching strategies using React Query, reducing API calls by 60% while maintaining real-time project updates.
  * Engineered a responsive and type-safe UI with TypeScript and modern React patterns, achieving a 90+ Lighthouse score for performance and accessibility.

- **Redacted Event App**
  * Engineered a modular event platform using React, Vite, and TypeScript, with a reusable architecture that allows rapid deployment for different events while requiring minimal code changes.
  * Implemented core features including QR code authentication, wallet integration, and user-to-user transactions using React Query for efficient state management and real-time updates.
  * Developed a scalable component system with Chakra UI, encompassing profile management, event navigation, and interactive reward systems, resulting in 70% code reusability across different events.

Upwork — Remote Freelance
Frontend Engineer — *Aug 2024 – Present*

- **GetCULTD** | *Website*
  * Architected and developed a comprehensive CRM dashboard using Next.js, integrating shadcn-ui and TailwindCSS to create a polished, professional interface for KOL management.
  * Implemented advanced features including secure authentication, dynamic search functionality, and a Kanban board system, enabling efficient influencer campaign management and tracking.
  * Built a multi-platform solution comprising both an admin dashboard and a public campaign website, facilitating seamless interaction between KOLs and campaign managers with React Query for real-time data synchronization.

AWARDS & ACHIEVEMENTS

ETHDenver 2023 BUIDLathon Runner-up: Secured 2nd place among 200+ teams by developing a decentralized events platform leveraging NEAR Protocol's social contracts. The solution enabled secure event management and social interactions in Web3 space.
