SUMMARY

- Frontend developer shipping production interfaces with React and Next.js across SaaS, marketing sites, and wallet-based products. Comfortable owning UI architecture, API-backed features, and release quality alongside designers and backend engineers.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript, HTML/CSS, TailwindCSS, TanStack Query, Zustand, Redux, shadcn/ui
- **Practices:** responsive layouts, component-driven UI, client state and data fetching, code review, Git-based workflows
- **Backend & data:** REST APIs, Node.js, Python, Convex, MongoDB, PostgreSQL, SQL
- **Wallets & chains:** wallet connect flows, NEAR, Solana; Web3.js, Ethers.js
- **Tooling:** Git, Docker, GitHub Actions, Vercel, DigitalOcean, Figma, Jest, Playwright, Stripe integrations

EXPERIENCE

- **Potlock / Cooked.business** Remote
Frontend Developer Jan 2025 – Present
 - **reply.cash:** Built the production frontend for a Solana wallet product centered on stablecoin payouts, including payment flows, wallet connection, and social sign-in.
 - **PraySAP:** Delivered the UI for a prayer hosting and discovery product aimed at Muslims who travel often, covering listings, search, and the core end-user journeys.
 - **Potlock & collaboration:** Implemented donation and marketing experiences for the Potlock ecosystem. Worked closely with designers and backend engineers through Git, code review, and shared release planning.
- **CULTD** Remote
Frontend Developer 2024 – Present
 - **Multi-surface frontend:** Owned the UI across the client landing site, operator application, and participant dApp (try.getcultd.com, app.getcultd.com, dapp.getcultd.com) for a campaign product serving more than 1000 active users.
 - **Marketer and participant flows:** Built interfaces for discovering KOLs, configuring campaigns, and growing organic reach around launches, plus end-user flows in the engagement dApp with wallet auth and reward states tied to on-chain rules.
 - **Verification:** Implemented Twitter/X-driven verification and wallet-based sign-in so eligibility, tasks, and payouts stayed consistent with campaign rules.
- **GodlyWindows** Remote
Frontend Developer 2023 – Present
 - **Brand sites:** Developed the primary business website and related properties (RemovedFast, GodlyHolidayLights, GodlyPainting) with long-form content, clear navigation, and reusable page patterns.
 - **SEO and quality:** Shipped SEO-oriented landing and blog experiences and kept layouts responsive and stable as content volume grew.
- **NEAR Builders** Remote
Frontend Developer 2023 – 2024
 - **BOS and events:** Shipped NEAR Builders gateway experiences on BOS with composable UI and dependable wallet flows. Built a hackathon attendee application with scavenger-hunt and on-site game mechanics.

- **Flagship programs:** Led the frontend modernization of the NEAR DevHub portal and developed NEAR Catalog, a discovery experience for more than 350 ecosystem applications with search and filtering.
- **dApp delivery:** Implemented production dApp interfaces with wallet sign-in, contract calls, and careful handling of failure states. Contributed frontend work to BetVex before the initiative was discontinued.
- **Freelance (Upwork & direct clients)** Remote
Frontend Developer *Jan 2023 – Present*
 - **Client work:** Delivered marketing sites, Stripe-backed funnels, and product frontends in React, Next.js, and TypeScript for Web3 and SaaS clients through Upwork and direct contracts.
 - **Representative projects:** Examples include the NTCO marketing site, checkout and funnel flows integrated with Stripe, and the Ketoslim frontend, alongside additional smaller engagements.

PERSONAL PROJECTS

- **Milksage:** Full-stack dairy operations SaaS for herd and health records, milk production analytics, payouts, and role-based workspaces for farm staff. Built with React, Next.js, TypeScript, Convex, and Clerk.
- **Ray tracer (myRayTracer):** Physically based ray tracer implemented in C++ to explore rendering fundamentals outside of day-to-day product work.
- **NEAR BOS Web Component (near-bos-webcomponent):** Embeddable web component that hosts NEAR BOS experiences inside arbitrary sites, useful for decentralized frontends that need a simple integration surface.

EDUCATION

- **The Islamia University of Bahawalpur** Bahawalpur, Pakistan
Bachelor of Science in Computer Systems Engineering *3.72/4.00 CGPA; Graduated 2025*
