SUMMARY

- Frontend developer shipping production interfaces with React, Next.js, and TanStack Start across SaaS, marketing, and wallet-based products. Owns UI architecture, SSR, accessibility, performance, and release quality alongside designers and backend engineers.

EXPERIENCE

- **Potlock / Cooked.business** Remote
Frontend Developer Jan 2025 – Present
 - **reply.cash:** Built the production frontend for a Solana stablecoin payments app with WalletConnect/Solflare flows, social sign-in, cross-chain on-ramps, and zk-private transfers via Light Protocol; Next.js App Router with SSR, React 19, TanStack Query, Radix/Base UI.
 - **PraySAP:** Delivered the UI for a global prayer-hosting and discovery PWA used by Muslim travelers worldwide, covering listings, location search, and the core end-user journeys.
 - **Potlock:** Implemented donation and marketing experiences for the Potlock public-goods ecosystem, which has funded hundreds of open source NEAR projects.
- **Freelance (Upwork & direct clients)** Remote
Frontend Developer Jan 2023 – Present
 - **CULTD:** Owned the UI across the operator app and participant dApp (app.getcultd.com, dapp.getcultd.com) for a campaign product serving 1000+ users; built KOL/campaign flows, wallet sign-in with Twitter/X verification, on-chain reward states, and Jest coverage on critical paths.
 - **GodlyWindows:** Developed the business site and brand properties (RemovedFast, GodlyHolidayLights, GodlyPainting) with Next.js SSR and SEO-driven landing/blog templates; technical SEO and Core Web Vitals work drove a 50% lift in conversions.
 - **NTCO, Ketoslim & other clients:** Marketing sites, Stripe checkout and funnel flows, and product frontends in React, Next.js, and TypeScript for Web3 and SaaS clients.
- **NEAR Builders** Remote
Frontend Developer Jul 2023 – Oct 2024
 - **NEAR DevHub:** Led frontend modernization of the NEAR DevHub portal serving hundreds of developers, with SSR and Playwright E2E on critical flows; reviewed code across the BOS and DevHub repos.
 - **NEAR Catalog:** Developed NEAR Catalog, a discovery experience for 350+ ecosystem applications with search and filtering.
 - **Events:** Built a hackathon attendee app used by thousands of attendees, with scavenger-hunt and on-site game mechanics.

EDUCATION

- **The Islamia University of Bahawalpur** Bahawalpur, Pakistan
B.S. Computer Systems Engineering, GPA 3.71/4.00 Graduated 2025

TECHNICAL SKILLS

Frontend: React, Next.js, TanStack Start, TypeScript, JavaScript, HTML/CSS, TailwindCSS, Radix UI, Base UI, shaden/ui, TanStack Query, Zustand, Redux

Practices: SSR/SSG, accessibility (Radix/Base UI), Core Web Vitals & performance, responsive layouts, code review, Git workflows

Backend & data: REST APIs, Node.js, Python, Convex, Supabase, MongoDB, PostgreSQL, SQL

Wallets & chains: WalletConnect, NEAR, Solana; Web3.js, Ethers.js

Tooling: Git, Docker, GitHub Actions, Vercel, DigitalOcean, Figma, Jest, Playwright, Stripe integrations
