## SUMMARY

---

- Frontend developer shipping production interfaces with React and Next.js across SaaS, marketing sites, and wallet-based products. Comfortable owning UI architecture, API-backed features, and release quality alongside designers and backend engineers.

## EXPERIENCE

---

- **Potlock / Cooked.business** Remote  
*Frontend Developer* Jan 2025 – Present
  - **reply.cash:** Built the production frontend for a Solana wallet product centered on stablecoin payouts, including payment flows, wallet connection, and social sign-in.
  - **PraySAP:** Delivered the UI for a prayer hosting and discovery product aimed at Muslims who travel often, covering listings, search, and the core end-user journeys.
  - **Potlock & collaboration:** Implemented donation and marketing experiences for the Potlock ecosystem. Worked closely with designers and backend engineers through Git, code review, and shared release planning.
- **Freelance (Upwork & direct clients)** Remote  
*Frontend Developer* Jan 2023 – Present
  - **CULTD:** Multi-year engagement owning the UI across the client landing site, operator application, and participant dApp (try.getcultd.com, app.getcultd.com, dapp.getcultd.com) for a campaign product serving more than 1000 active users. Built marketer flows for discovering KOLs and configuring campaigns, plus end-user flows in the dApp with wallet sign-in, Twitter/X-driven verification, and reward states tied to on-chain rules.
  - **GodlyWindows:** Developed the primary business website and related brand properties (RemovedFast, GodlyHolidayLights, GodlyPainting) with long-form content, reusable page patterns, and SEO-oriented landing and blog experiences; kept layouts responsive and stable as content volume grew.
  - **NTCO, Ketoslim & other clients:** Delivered marketing sites, Stripe-backed checkout and funnel flows, and product frontends in React, Next.js, and TypeScript for Web3 and SaaS clients through Upwork and direct contracts.
- **NEAR Builders** Remote  
*Frontend Developer* 2023 – 2024
  - **Flagship programs:** Led the frontend modernization of the NEAR DevHub portal and developed NEAR Catalog, a discovery experience for more than 350 ecosystem applications with search and filtering.
  - **Events:** Built a hackathon attendee application with scavenger-hunt and on-site game mechanics.

## EDUCATION

---

- **The Islamia University of Bahawalpur** Bahawalpur, Pakistan  
*Bachelor of Science in Computer Systems Engineering* 3.72/4.00 CGPA; Graduated 2025

## TECHNICAL SKILLS

---

- **Frontend:** React, Next.js, TypeScript, JavaScript, HTML/CSS, TailwindCSS, TanStack Query, Zustand, Redux, shadcn/ui  
**Practices:** responsive layouts, component-driven UI, client state and data fetching, code review, Git-based workflows  
**Backend & data:** REST APIs, Node.js, Python, Convex, MongoDB, PostgreSQL, SQL  
**Wallets & chains:** wallet connect flows, NEAR, Solana; Web3.js, Ethers.js  
**Tooling:** Git, Docker, GitHub Actions, Vercel, DigitalOcean, Figma, Jest, Playwright, Stripe integrations
